

TRU CATCH

Setting Your Tru Catch Trap

This is a properly set Tru Catch Trap.

The following Instructions apply to all Tru Catch Models

www.trucatchtraps.com

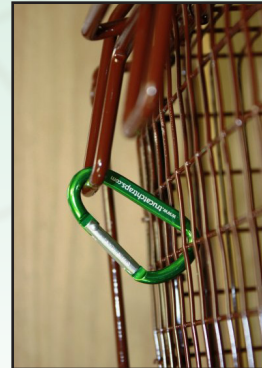

SETTING YOUR TRU CATCH TRAP

1. Raise both rings to the top of the door.
2. Pull the door towards you and fully open it.
3. Turn the trigger 90 degrees counter-clockwise.
4. Lower the door to rest it on the trigger.
5. Your Tru Catch Trap is now set and ready for bait.

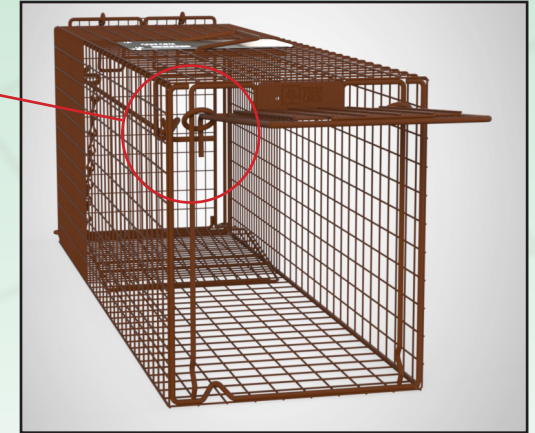

ADJUSTABLE TRIGGER ROD
(moving it down creates a sensitive setting for lighter animals)

FIXED TRIGGER ROD

The Tru Catch clip is intended to secure the trap's rear door to prevent accidental release of a captured animal in the event that the door handle is improperly used as a carry handle.

BAITING YOUR TRU CATCH TRAP

Take a small amount of bait and place it approximately 3 to 4 feet in front of the trap, and again approximately 1 foot in front of the trap, then a small amount just inside the trap door and a spoonful just behind the trip plate.

RELEASING AN ANIMAL

To release an unwanted catch from your Tru Catch Trap use the rear release door or simply turn the trap over on its top for the single door models. The door will automatically open for release.
