

SETTING YOUR TRU-CATCH TRAP

1. Tru-Catch Bird Traps require no “setting”.
2. Simply place the bait as instructed below, and be sure that the top door is fastened properly.
3. Once the bird walks through the rakes, it will not be able to get out.

BAITING YOUR TRU-CATCH TRAP

Take a small amount of bait and place it approximately 3 to 4 feet in front of the trap, and again approximately 1 foot in front of the trap, then a small amount just inside the trap door and a handful in the back of the trap.

To release an unwanted catch from your Tru-Catch Trap use the top release door to reach in and grab the bird. Or turn the trap upside down so the front rakes flip open and the bird will find its way out.
